CAREER OBJECTIVE

Creative and detail-oriented Front-End Developer with a strong foundation in UI/UX design, including wireframing and prototyping. Skilled in converting design concepts into responsive, user-friendly web interfaces using HTML, CSS, and basic JavaScript. Familiar with design tools like Figma and Adobe XD, along with AI tools, and able to effectively use them to create design ideas, improve layouts, and complete tasks efficiently. Comfortable working with AI to both perform tasks and generate solutions that enhance productivity and workflow. Passionate about building intuitive digital experiences and seeking a full-time opportunity to start my career and grow in frontend and UI/UX.

PROJECT

Project: The Confectionary chronicle (UI-UX)

- Designed a UI/UX concept for “The World’s Tastiest Digital Patisseries” (bakery platform) using Figma, focusing on a modern and visually appealing interface. Created user-friendly layouts for showcasing sweets and bakery. products with clear navigation and attractive design elements. Applied user-centered design principles to improve usability and overall user experience. Developed wireframes and high-fidelity designs, ensuring consistency in colors, typography, and layout.

Netflix Clone Website (Frontend)

- Built a visually appealing Netflix Clone website using HTML and CSS, replicating the original platform’s design and layout. Created hero section, movie rows, thumbnails, and footer with emphasis on responsive design and UI/UX best practices.
